Bachelor of Engineering

Subject Code: 3141009

Semester – IV

Electromagnetic Theory

**Type of Course:** Electromagnetic Theory and Wave Propagation

**Prerequisite:** Basic knowledge of vector calculus, Electric and Magnetic fields and its laws.

**Rationale:** This course provides strong foundation for understanding the fundamental principles and laws of electromagnetism to understand transmission, radiation and propagation theory. Students can understand the physical interpretation and application of various laws and theorems of electric and magnetic fields. The students can also understand the principles of transmission lines.
